

# TRACK AND MANAGE YOUR OPERATIONS FROM DOOR TO DOCK

with Zebra's purpose-built RFID technologies  
- Designed for maximum visibility.

**DataCapture**  
SOLUTIONS

## MANAGING INVENTORY AND ASSETS...

is crucial to maintaining efficient and productive business operations. Improper inventory visibility and lost assets can fail to meet rising consumer expectations and adapt to shifting supply chain challenges. This forces businesses to find new solutions that can reinforce the order fulfillment process while fighting issues such as:

Incomplete supply chain visibility due to poor communication

Multiple inventory and picking errors from manual data processing

Inability to adapt to future demands alongside smaller workforces

## THAT'S WHERE DCS HELPS TRACKING AND TRACING.

To boost inventory accuracy and asset tracking, DCS and Zebra partner to bring your business modernized intelligence and durable mobility with reliable RFID technology solutions. RFID tech gives your workers the information they need to make better decisions, withstands challenging environments to deliver consistent productivity, and can help simplify deployment and device management. DCS and Zebra work together to provide your business with a family of RFID solutions that help you keep track of your inventory and assets with:

- 99.99% order accuracy from automated data capture
- Minimized labor costs from fewer errors
- Simplified asset tracking to cut down on downtime
- Create faster order fulfillment by cutting order fulfillment times

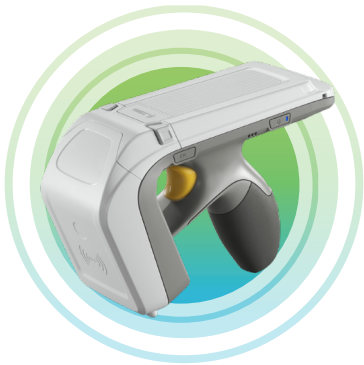

## AS A ZEBRA PARTNER,

DCS tailors an asset visibility solution that matches your workflows and workspace requirements. Utilize actionable insights to maximize asset availability with real-time tracking from the RFID Product Family.

### Empower higher efficiency and accuracy with the **MC3390R Long-Range RFID Reader**

- Best-in-class RFID read range in T&L, warehousing, and manufacturing
- 25% faster and over 40% more accurate read rate for higher performance
- Built for use in T&L, warehousing, and manufacturing with dependable durability
- Simplify deployment for low TCO with flexible tools

### Add high-performance data capture with the **RFD8500 Series Sleds**

- Enterprise-class RFID and 1D/2D barcode scanning
- Fast RFID tag capture in transportation, retail, and warehouse management
- Superior battery cycle times to ensure full-shift power
- Flexible deployment options enable RFID when and where you need it

### Boost productivity at the point of sale with the **DS9908R Series Hybrid Imager**

- Scan virtually every barcode for unparalleled performance
- Bring fast, superior checkout performance to retail, QSR, and convenience stores
- Flexible switching between hands-free and handheld modes

### Implement intelligent and tougher printing with the **ZT600 industrial printer**

- Equip your workforce with 24/7 reliability in the harshest environments
- User-friendly setup to streamline day-to-day operations
- Superior, adaptable performance for manufacturing, T&L, retail, and healthcare

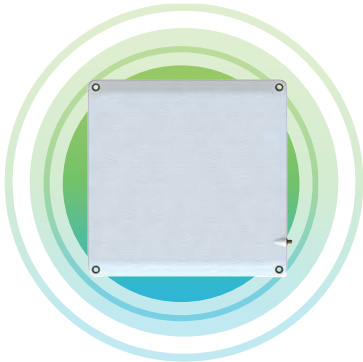

Equip your workers with the  
**ZQ630 RFID mobile printer's premium, on-the-go printing**

- Paired RFID and mobility to give your retail, warehouse, T&L, and healthcare workers more flexibility
- Faster, most dependable wireless connections
- Lightweight and comfortable to wear while also delivering long-lasting durability

Get faster, more accurate read rates and consistent performance  
**with the FX7500**

- Simplify management in any enterprise
- Minimize delays, complications, and unexpected costs
- Place your devices where you need them the most
- Ideal for warehousing/distribution, retail, manufacturing, and transportation

Empower efficient tracking in outdoor environments with the  
**AN510 RFID antenna**

- Suitable for use in a wide range of indoor and outdoor environments
- Versatile flush and VESA-studded mounting options for simple installation

Choose a wide frequency range with the  
**AN480 wide-band RFID antenna**

- Installed throughout the enterprise in manufacturing/warehouse environments
- Low axial ratio nearly 50% lower than competitors for better performance

# INTEGRATE A FAMILY OF RFID PRODUCTS WITH RELIABLE PERFORMANCE.

Data Capture Solutions strives to help you optimize your inventory and asset management process with a dependable family of RFID solutions. Stay prepared for rising challenges and demands with the right handhelds, readers, printers, and antennas for your needs.

Creating an enterprise that successfully implements innovative technology fosters scalability and future-forward productivity. Let Data Capture help you equip your business with dependable RFID solutions when you contact us today.
