

# PCCHARGE

TURN YOUR BUSINESS COMPUTER INTO A PAYMENT DEVICE

## Flexible Payment Processing on your PC

You use your PC for many business functions, from tracking inventory to maintaining customer and employee databases and accounting. Why not use it to accept payments as well? **PCCharge** payment software from VeriFone turns any PC into a payment-accepting device, without interfering with other programs.

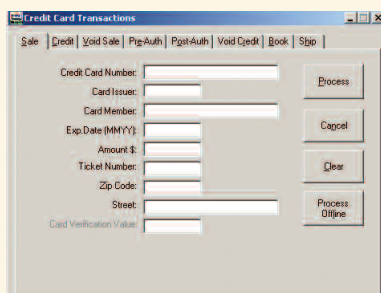

VeriFone's **PCCharge** offers easy-to-use, PC-based payment processing. The Windows-based application is user-friendly, and features intuitive menu screens with action buttons that guide you step-by-step through the program.

**PCCharge** supports a wide range of peripherals, making it easy for you to accept all payment types, including credit, debit, EBT, check processing, gift/loyalty and more.

The customer database feature allows you to store repeat customers' data, providing a more efficient and targeted marketing opportunity. **PCCharge** allows businesses that charge regular monthly fees, such as health clubs, to set up a specific date to process recurring payments.

If your business environment has more than one computer, **PCCharge** can reside on your network and allow multiple clerks to process transactions on a single merchant account.

And, as with all VeriFone products, **PCCharge** is dependable and secure, meeting the latest security and data file encryption standards.

The Windows-based screens are intuitive and simple to use.

### BENEFITS AT A GLANCE

- Windows-based and easy to use
- Supports multiple payment types
- Connects through dial or IP-based communications
- Customizable reporting, database and billing features

# Features and Benefits

## Easy to Use

- Windows-based user interface is familiar and intuitive, making **PCCharge** easy for your employees to learn and use
- Robust reporting features simplify account reconciliation and business management

## Functional and Flexible

- Connects with your existing dial or IP-based PC communications, eliminating the need for additional lines
- Accepts all payment types, including credit, debit, EBT, check, gift and loyalty – giving customers a full range of payment options
- Customizable database stores customer information – beneficial for direct mail or loyalty programs
- Recurring billing feature allows you to schedule automatic payments – for added convenience and efficiency
- System Requirements: Windows 98, 2000, NT, XP or 2003; 64 MB RAM; 30 MB free hard disk space; 400 MHz processor or higher; CD-ROM; Microsoft Internet Explorer version 6 or higher.

## Secure and Reliable

- PCI (Payment Card Industry) and PABP (Payment Application Best Practices) validated
- Utilizes the latest security standards to protect against fraud and data tampering:
  - Address and cardholder verification capability may help mail-order/telephone-order merchants qualify for lower processing rates and reduce fraudulent transactions
  - Meets up-to-date compliance standards for Visa and MasterCard
  - Multi-tiered permission levels for users protect customer information by limiting what employees can view
