WPA1200wm

MOBILE COMPUTER

Big Business Tools. Small Business Attitude.

The Wasp WPA1200wm mobile computer is designed to meet the demands of today's highly-mobile workforce. This lightweight mobile computer is built to stand up to multiple 4-foot drops to concrete, and features an IP-64 rating for protection against water and dust. The Windows Mobile 6.1 operating system ensures easy use and integration into your environment.

Capture data in the field, warehouse, or on-the-go using the WPA1200wm. Easily scan barcodes using the integrated laser barcode scanner, or key in data using the 20-key keypad. Downloading data to your PC is simple with the included USB cable.

With 128 MB of SDRAM and 576 MB Flash ROM, the WPA1200wm is prepared to manage large databases with ease and exceed the performance requirements of daily, high-volume usage. The WPA1200wm is the perfect mobile computer for tracking assets or managing inventory in government, education, healthcare, retail, warehouse or business applications.
